

Kenny Nguyen

Minneapolis, Minnesota | (605) 380-5939 | periwinklepastel7@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

SHORT PROFILE

Passionate developer with experience building user-facing interfaces using HTML, CSS, and JavaScript, and a strong foundation in accessible, user-centered design. Familiar with modern development workflows including Git, version control, and front-end build processes. Brings direct experience working within the University of Minnesota's institutional environment, collaborating with different school departments.

TECHNICAL SKILLS

Languages: JavaScript, HTML, CSS, React, Tailwind CSS

Backend & Tools: Python, Java, Supabase, PostgreSQL, Git, Docker

Design & UX: Nielsen's 10 Usability Heuristics, design system implementation, usability testing

Other Relevant Skills: Agile, Waterfall, code review, unit testing, version control, API integration

EXPERIENCE

Application Support - IT Systems

September 2023 – July 2024

University of Minnesota Twin Cities - Department of Information Technology

Minneapolis, MN

- Supported enterprise systems serving 10,000+ users, diagnosing and resolving configuration, access, and data integrity issues across general and specialized research platforms
- Diagnosed and resolved issues across general and specialized research platforms, gaining broad familiarity with the University's web and application ecosystem

Platform Support Specialist – Registration & IT Systems

July 2024 – May 2026

University of Minnesota Twin Cities - Department of Extension Learning Technologies

St. Paul, MN

- Provided support to a wide range of external and internal users, handling registration and account issues for university-hosted events, conferences, and educational programs using TeamDynamix and Destiny One platforms
- Guided users through platform setup and configuration, developing a strong working understanding of how users interact with institutional web systems and where interfaces create friction
- Managed sensitive user data and registration transactions across multiple channels (phone, email, in person), ensuring accuracy, confidentiality, and secure data handling

PROJECTS

Artemis — Python, React, Tailwind CSS, Supabase — *[Github](#)*

March 2026 - Present

- Built a full-stack dashboard that pulls daily options flow and gamma exposure data for SPX contracts, processes it through a Python backend, and renders it as a dynamically formatted, responsive React interface
- Designed the front-end data tables with conditional formatting to make complex nested financial data immediately readable at a glance, applying practical UX judgment to a dense information problem
- Integrated Supabase (PostgreSQL) for data storage with Row Level Security and environment variable management to protect backend infrastructure and API routes

Helenus — Python, Pandas — *[Github](#)*

March 2026 - Present

- Built and shipped a backend system in Python that aggregates real-time financial data from multiple external sources, processes it asynchronously, and delivers automated outputs to end users
- Designed an API pipeline chaining three data sources (Finnhub → NewsAPI → yfinance) with automatic fallback logic, ensuring continuous data availability even when upstream providers hit rate limits or go down
- Wrote a scoring algorithm that pulls from five data modules including live options chains, overnight futures, and technical levels, returning a consolidated output in under 15 seconds

EXTRACURRICULARS

League of Legends Esports Player — Co-Captain

May 2023 - Present

- Varsity, D1 Esports Athlete. Placed top 16 in the country in Collegiate eSports (2025). Ranked Top 10 Players in the North American region
- Organized practice schedules, led post-match reviews, and served as the main point of contact between players and coaching staff. Scouted opponents and broke down gameplay data to build game plans ahead of matches, translating analysis into team strategy

EDUCATION

University of Minnesota Twin Cities

Bachelor of Science in Computer Science; GPA: 3.4

Minneapolis, MN

Graduated May 2026
